WORK EXPERIENCE

STAYKool Productions

May 2022 - Present

Software Engineer

Remote

- As Software Engineer, I oversee the frontend and backend to all of our Squizz projects.
 - Through STAYKool Productions Squizz division, I've updated and maintained our sites where 1000's of customers monthly upload and manage their media, scheduling, and playlists to our server. From there, they have access to digital signage from any devices.
- **Recent Projects**
 - [Squizz Digital Signage](#) - Marketing site where customers can sign up and login, choose their pricing option.
 - [Squizz Pro Media](#) - Dashboard for customers where they can upload their media, choose playlists, scheduling, and edit devices.
 - **Squizz Pro Customer** - Admin Dashboard that I converted from Backbone.js, and Vanilla JavaScript, to Vue, and TypeScript for faster load times, and better interactive UI.
 - [Google Play Squizz APK](#) - Used Android Studio to create a Cordova application for Mobile Devices to use our product
- Collaborated to build modern and responsive web applications using best practices.
- Applied agile methodologies like SCRUM for project management

100 Devs Agency

Jan 2022 – Jan 2023

Software Engineer

Remote

- Collaborated with a team of developers to create full scale web applications for clients
- Worked as a team to teach others about web development.
- Projects
 - Gratitude Journal App - A full stack app where users can upload images or texts of the many things in live they are grateful for. Users can upload images, captions, and be able to see past posts. Reminding them of the many things in life they've been grateful for.
 - Lava Java Coffee Co - A beautiful coffee shop website for all of your caffeinated needs.
 - Mighty Hands MMA - A Martial Arts website, catered towards changing kids lives by introducing mentors, overcoming obstacles, and helping them transition into a better quality of life.
 - Other Projects
 - Pokemon Search Application
 - Weather Application using OpenWeather API
